REQUEST FOR REFUND

Sir:

In connection with the above-identified application, Applicants request a refund of \$450.00 for a two month extension fee, which was erroneously charged to our Deposit Account 06-1205. It is requested that the refund be applied as a credit to that Deposit Account. The reason for the refund is explained below.

Attached are copies of an Office Action dated March 23, 2005, and a Response to Restriction Requirement, which Applicants filed on June 23, 2005, in response to that Office Action, with a Certificate of Mail. While the Office Action was a restriction requirement, that Action set a three-month period for response, and hence no extension of time was required in connection with that Response.

The Patent Office's Monthly Statement of Deposit Account, dated July 2005 (copy attached), indicates that Deposit Account No. 06-1205 was charged the fee of \$450.00. Therefore, Applicants respectfully submit that a refund of \$450.00 is due.

Accordingly, Applicants hereby request a refund and authorize the Commissioner to credit Deposit Account No. 06-1205 in the amount of \$450.00, to resolve this matter.

Applicants' undersigned attorney may be reached in our New York office by telephone at (202) 530-1010. All correspondence should continue to be directed to our below-listed address.

Respectfully submitted,

DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-15, drawn to combining plurality of print jobs into a single print job when the job is authenticated, classified in class 358, subclass 1.14, 1.18, and 450.
 - II. Claims 16-44, drawn to authentication request for outputting print data, classified in class 713, subclass 170 and class 705, subclass 50.

The inventions are distinct, each from the other because of the following reasons:

2. Inventions in Group I and II are related as combination and subcombination. Inventions in this relationship are distinct if it can be shown that (1) the combination as claimed does not require the particulars of the subcombination as claimed for patentability, and (2) that the subcombination has utility by itself or in other combinations (MPEP § 806.05(c)). In the instant case, the combination as claimed does not require the particulars of the subcombination because combination is considered to be the authentication step to output a print job. Subcombination is considered to be combining print jobs and outputting them based on authentication result.

Checking authentication in case of combined print job is one utility. Authentication step in Group II can be performed for variety of reasons including control of printing confidential documents and thus does not require the additional limitation of combining print jobs in Group I.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.

5. Two telephone calls were made to applicant representative on March 9 and 10, 2005 to request an oral election to the above restriction requirement, but could not locate the attorney of record to discuss election of preferred group.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
